

TANISHA DAS

B.Tech CSE | Developer | AI-ML & data Science | System & IoT

Belegkata, Kolkata, West Bengal, India • +91 74392 58995 • tanishdas108@gmail.com • [GitHub](#) • [LinkedIn](#)

EDUCATION

Techno India University, Kolkata, 2023-2027

CGPA: 8.38 / 10

B.Tech in Computer Science and Engineering

Labanhrad Vidyapith, Kolkata, 2023

80.2%

Higher Secondary Education (Science) — Bengali, English, Mathematics, Physics, Chemistry, Biology

Begum Rokeya Smriti Balika Vidyalaya, Kolkata, 2021

75%

Secondary Education, WBBSE — Bengali, English, Mathematics, Life Science, Physical Science, History, Geography

TECHNICAL SKILLS

Languages: Python, C/C++, Java, Bash, HTML/CSS/JS

Frameworks & Libraries: NumPy, Pandas, Scikit-learn, Seaborn, Matplotlib, Plotly, React, Tailwind CSS

Backend & Databases: FastAPI, SQLAlchemy, Uvicorn, JWT Authentication, Data Validation, MySQL

Tools & Platforms: Git/GitHub, VS Code, Vite, Jupyter Notebook, Figma, Vercel, Excel, GNOME

Embedded & IoT: ESP32-S3, L298N Motor Driver, IR Sensors, PWM Control, PlatformIO, Arduino IDE

Soft Skills: Project Management, UI/UX Design, Communication, Teamwork, Web Development

WORK EXPERIENCE

AI/ML Project-Based Intern — IBM (PBEL)

Jan 2026

Completed IBM's Project-Based Experiential Learning virtual internship, applying AI/ML concepts to hands-on, industry-relevant projects.

Data Science Intern — CodeAlpha

Feb 2026

Applied core data science concepts through hands-on projects, building practical, future-ready analytical skills.

Java Programming Intern — CodSoft

Dec 2025

Gained hands-on experience developing Java-based solutions while strengthening core programming and object-oriented concepts.

Professional Development Workshop — e133 & Tata Consultancy Services (TCS)

2024

Collaborated on corporate communication and teamwork exercises; strengthened critical thinking and problem-solving through structured, hands-on activities.

Self-Initiated Projects — DSA & Linux Programming

Aug 2024

Implemented core data structures (arrays, linked lists, stacks, queues, trees) and algorithms (sorting, searching, graph traversal) in C++; developed and optimized scripts in Linux to improve system-level efficiency.

PROJECTS

Employee Salary Prediction (Python, Scikit-learn)

Sep 2025

Built a regression-based ML model to predict employee salaries from experience, location, and job rate; handled missing values and categorical encoding to achieve 83% accuracy.

Peer-to-Peer File Sharing (Java)

Dec 2025

Developed a Java Swing-based file-sharing application using socket programming, event handling, multithreading, and file I/O within a client-server architecture for efficient, user-friendly peer-to-peer transfers.

Unemployment Analysis During COVID-19 (Python, EDA)

Jan 2026

Conducted exploratory analysis of unemployment trends before, during, and after COVID-19 using NumPy, Pandas, Matplotlib, and Seaborn; visualized regional disparities and pandemic-driven spikes through charts and heatmaps.

Dyslexia Assist - Access ED (Smart India Hackathon)

Sep 2025

Built a full-stack adaptive learning platform (React, Tailwind CSS, Node.js, Express.js, Python, Flask, Database, Vercel) with gamified exercises and assistive tools, plus community features that help individuals with dyslexia build confidence and connection.

Fraud Detection App (Python, ML)

Mar 2026

Developed a real-time fraud detection system using a decision-tree classifier, achieving 94% accuracy through feature engineering and EDA; handled imbalanced and missing data, evaluating performance via accuracy, precision, recall, and F1-score.

IoT Saree Folding & Pressing Machine (ESP32-S3, C++, L298N Motor Driver, IR Sensors, PlatformIO, PWM)

Designed and prototyped a compact, automated saree-folding machine for small textile retailers using PWM-synchronized motor control and real-time IR sensor feedback; resolved position-drift issues through precision stopping and timing calibration, optimizing for low-cost, minimal-intervention deployment.

CERTIFICATIONS

Machine Learning — IBM

Jan 2026

ETL processes and big data fundamentals; data gathering, identification, and cleaning for analysis.

Java Programming — CodeSoft

Jan 2026

Core programming syntax and OOP concepts; procedural programming paradigms and logic-building.

Data Science — Billion-AI

Mar 2024

Comprehensive data lifecycle and stages of analysis; applications for optimizing data efficiency and accuracy.

Professional Development Workshop — Certificate of Participation, e133 & TCS

Sep 2024

ADDITIONAL INFORMATION

Languages: Bengali (Native), English (Professional), Hindi (Conversational)

Core Subjects: Data Structures & Algorithms, OOP, DBMS, Microprocessors & Microcontrollers, Operating Systems, Computer Networks, Discrete Mathematics, Probability

Interests: IoT Automation, Linux Internals, Full-Stack Development, AI/ML, Data Science, Data Analysis, DevOps
